before

PROJECT SCOPE

Fire safety works to modern multistorey building in Southsea, Portsmouth involving removal and replacement of extensive rendering and reconstructing brickwork areas. All works carried out whilst building with 64 flats was fully occupied.

KEY OUTCOMES

Resident safety assured with A2 - s1, d0 fire-rated cladding installed

Best value achieved by a solution with long-term integrity surpassing current standards.

High quality refurbishment that matches the original visual look of the building

Completed whilst fully occupied with minimum disruption to residents

Should the cladding no longer be required it is 100% recyclable.
